

RCRA Compliance Evaluation Inspection

Philadelphia Operations  
General Electric Company  
6901 Elmwood Avenue  
Philadelphia, Pa. 19142  
215-726-3072

EPA I.D. No. PAD046558037

Date of Inspection: January 30, 1996

EPA Representative: Ronald Jones  
Environmental Protection Specialist

Kenneth J. Cox  
Environmental Engineer

Facility Representatives: Michael R. Fairley  
Manager, EHS, Philadelphia Area

### Background

EPA Region III requested that the Facilities Inspection Program (FIP) conduct a RCRA Compliance Evaluation Inspection at the Philadelphia Operations, General Electric Company, Philadelphia, Pa. 19142.

### Permit Status

The Philadelphia Operations site currently operates under Part A (Interim Status). This facility operates four <90 day storage areas.

### Facility Description

Philadelphia Operations manufactures electric switch gear, breakers, and many another types of electric equipment. This site is located near the Philadelphia International Airport.

### Inspection Observations

#### CEI Section

During the tour of the facility, the following areas were inspected.

#### <90 Day Storage Area #1

##### Paint Solids #U49615

This area is the paint booth and the paint shop as shown in photo #2. The inspectors inspected the paint booth and shop area and no problems were found during this inspection. The one waste drum that was present is inside of a plastic drum on wheels. The drum has a lockable cover (cap) on the funnel and the drum was marked with the inhouse colored label for hazardous waste. The yellow hazardous waste label is placed on the drum on the day of the shipment, by Clean Harbors, Inc.

<90 Day Storage Area #2

Rags Contam. with Solvents #U49605

This area was inspected and no problems were found. It contains same type of drum as shown in photo #3. The containers on top of the drum, are to be placed in the drum. The gray can near the drum is for rags.

<90 Day Main Storage Area #3

Paint Cans with Residue

This area is the main storage before drums are shipped offsite. There were two drums of waste paint sitting on the pallet during this inspection. One of the 55 gallon drums was open at the top as shown in photo #6 & 7. The drums were marked with the inhouse colored label for hazardous waste. The accumulation starting date was on the label with the words "Hazardous Waste". No other problems were found in this storage area.

When drums from the other <90 day storage areas are received in this area, the accumulation date stays the same. They are now ready for shipment. Next to this area is a driveway where the drums are picked-up by Clean Harbors, Inc. Clean Harbors prepares the drums by placing the yellow hazardous waste label on the drums and filling out the manifest for shipment. In the driveway were two drums of non-hazardous waste as shown in photo #8. The drum had a inhouse colored label on them. A problem was found with the driveway. It had a crack in the wall and along the edge of the driveway as shown in photo #9. This driveway had a continuous poured surface with a well for collecting spills at the end of the driveway. When the driveway was poured, there were no curbs on

either side of the driveway, only at the end. If there was a spill of hazardous waste in this driveway, it would leak through the cracks. This driveway is inside the building next to the <90 day main storage area.

<90 Day Storage Area

Plasma Flashing Dust

The dust (D007) from this operation is collected in the drum under the silo as shown in photo's #4 & 5. The drum had a inhouse colored label and was marked with the words "Hazardous Waste" and the date. No problems were found in this area during this inspection.

New Flammable Storage Shed

<90 Day Storage Area

This storage shed is located on the outside in the rear of the building. The storage area was inspected and nothing was found inside. It did not appear to be in use at this time. Photo #10 shows the new flammable storage shed.

Building 12A

Closed Operation

This building was a plating & waste treatment operation on site. The inspectors inspected the building and it was empty. The underground storage tanks at this building contained rain water. The discharge from these tanks was to the city of Philadelphia but it now has been sealed. The demolition of the building will begin, sometime in the near future, after all approvals have been granted.

Photographs

1. The inhouse colored label for the raw stock at this site.
2. The drum inside the Paint Booth.
3. Other drum in the <90 day storage area.
- 4 & 5. The dust entering the drum from the silo.
- 6 & 7. Open drum in <90 day main storage area.
8. Receiving area & driveway.
9. The cracked wall & edge of driveway.
10. New Flammable Container Building.

Recordkeeping

All of the RCRA related records were checked and found to be satisfactory except for the following: (1) the information on the Clean Harbors, Detail GWMPS Listing by Customer was found to be incorrect. On page 4, in the column "Approved" for Paint Solids U49615, there is a "E" which means expired. This is incorrect since the area has not expired. It still operates as a <90 day storage area. Some of the other information on this sheet is questionable also, (2) the facility needs a written job description for each person and a written description of the type and amount of training that will be given to each person as required in 40 CFR 265.16 (f) (2) & (3), and (3) the current emergency coordinators list needs to be updated as required in 40 CFR 265.52 (d). The appropriate RCRA checklist forms were completed during this inspection.

Other Problems

Other problems found during this inspection are as follows:

(1) open 55 gallon drum of waste paint in the <90 day main storage, and (2) crack in the wall and along the edge of the driveway in the receiving area for pick-up by Clean Harbors, Inc.

Attachments

1. Generator Checklist
2. LDR Checklist
3. Photographs
4. Manifests
5. Site Diagram
6. Detail GWMPS Listing by Customer
7. Fax from Clean Harbors, Inc.
8. 1993 Hazardous Waste Report

Compliance Status Summary

During the tour of the site and the checking of the facility records, the following problems were found: (1) the list of emergency coordinators needs to be updated as required in 40 CFR 265.52 (d), (2) the information on the Clean Harbors, Detail GWMPS Listing by Customer was found to be incorrect, (3) the facility needs a written job description for each person and a written description of the type and amount of training that will be given to each person as required in 40 CFR 265.16 (f) (2)&(3), (4) open 55 gallon drum of waste paint in the <90 day main storage area, and (5) crack in the wall and along the edge of the driveway in receiving area for pick-up by Clean Harbors, Inc.

( INSPECTOR NAME )

**GENERATOR CHECKLIST - PA FACILITIES**

Name of Facility: Philadelphia Operations

Address of Facility: General Electric Company

6901 Elmwood Avenue

Philadelphia, Pa. 19142

EPA I.D. Number: PAD046558037

Name/Title of Facility  
Representative: Michael R. Fairly

Manager, EHS, Philadelphia Area

215-726-3072

**I. General**

1. Provide a brief description of the type of operation(s) that produces hazardous waste at this facility:

See Report

2. Does the facility perform the following on-site:

a. storage (>90 day) of hazardous waste? yes  no

b. treatment of hazardous waste? yes  no

c. disposal of hazardous waste? yes  no

(if yes, complete appropriate TSD checklists)

**261.4**

3. Is the facility subject to any exclusions for its hazardous waste? yes  no

If yes, list the waste and the basis for exclusion:

---

---

**262.11(a)(3)**

4. Has the facility properly determined whether all of its waste exhibits any of the characteristics of hazardous waste? **yes** **no**

If yes, describe what this determination was based upon (i.e., testing or knowledge of process/materials used).

---

---

If no, describe omissions:

---

---

5. Has the facility failed to notify the State of any of its hazardous waste management activities, including locations of all hazardous waste accumulation areas? **yes** **no**

If yes, describe:

---

---

---

**II. Manifest**

Complete this section only if facility ships hazardous waste off-site.

**262.12(d)**

1. Has the generator offered a shipment of hazardous waste to a transporter that has not received an identification number?

**yes** **no**

**262.20(b)**

2. Does the facility use the Hazardous Waste Manifest provided by Pa DER whenever transporting hazardous waste? **yes** **no**

If no, explain: \_\_\_\_\_

If yes, review a representative number of manifests and indicate whether they contain:

**262.20(g)**

a. Generator's name, mailing address, telephone number and EPA ID number?  yes  no

b. EPA/State manifest document numbers?  yes  no

c. Total number of pages used to complete the manifest?  yes  no

d. Transporter's name and EPA ID number?  yes  no

e. DOT waste description, including proper shipping name, hazardous waste class and DOT identification number?  yes  no

f. Physical state and hazard codes for each waste?  yes  no

g. Number and type of containers (if applicable)?  yes  no

h. Quantity (either weight or volume) of each waste transported by hazardous waste number?  yes  no

i. Name, EPA ID number and site address of facility designated to receive the waste?  yes  no

j. The following certification?  yes  no

"I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packaged, marked, and labelled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

Unless I am a small quantity generator who has been exempted by statute or regulation from the duty to make a waste minimization certification under Section 3002(b) of RCRA, I also certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and I have selected the method of treatment, storage or disposal currently available to me which minimizes the present and future threat to human health and environment."

**262.22**

3. Does the manifest consist of eight copies?  yes  no

**262.23**

4. Did the generator:

a. Sign and date the certification statement on the manifest?  yes  no

b. Obtain the handwritten signature and date of acceptance from the initial transporter?  yes  no

c. Ensure that copies of the manifest were properly distributed?  yes  no

d. Ensure that return copies of the manifest from the designated TSD facility were properly signed and dated?  yes  no

e. Retain a copy of the signed manifest for at least twenty years?  yes  no

The inspector should obtain copies of any manifests that are found to have problems.

**III. Pre-Transport Requirements**

Complete this section only if the facility ships hazardous waste off site.

1. Is there any indication that the facility is:

**262.30(1)**

a. Not packaging its waste in accordance with DOT regulations (49 CFR Parts 173, 178 and 179)?  
 yes  no

**262.30(2)**

b. Not labelling each package in accordance with DOT regulations (49 CFR Part 172)?  yes  no

**262.30 (3)**

c. Not marking each container of 110 gallons or less with the words "hazardous waste ----" or each package of hazardous waste in accordance with DOT regulations (49 CFR Part 172)?      yes      no

If yes, explain: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**262.33**

2. Does the facility placard or offer the transporter placards for its hazardous waste shipments?      yes      no

**IV. Waste Accumulation**

Complete this section only if the facility accumulates hazardous waste for less than 90 days.

Note: Satellite accumulation is not allowed in Pa.

**262.34(a) (5)**

1. Does the facility maintain personnel training and other records required in 265.16?      yes      no

If yes, do these records include:

**265.16(f) (1)**

a. Job title for each position related to hazardous waste management and the employee filling each job?

yes      no

**265.16(f) (2)**

b. A written job description for each position?

yes      no

**265.16(f) (3)**

c. A written description of the type and amount of training that will be given to each person?

yes      no

**265.16(f) (4)**

d. Records that document that the training or job experience required by facility personnel to effectively respond to emergencies and otherwise manage hazardous waste in a proper manner has been successfully completed?

yes      no

**265.16(d)**

2. Have facility personnel successfully completed the required training or job experience within six months after occupying the position?  yes  no

**265.16(e)**

3. Do facility personnel take part in an annual review of the initial training requirements and update them as necessary?  yes  no

**262.34(a)(5)**

4. Does the facility maintain an adequate preparedness and prevention program as required in Chapter 265 Subpart C?  yes  no

Is the facility equipped with:

**265.32(1)**

a. Internal communications or alarm system?  yes  no

**265.32(2)**

b. Telephone or hand-held two-way radio, immediately available?  yes  no

**265.32(3)**

c. Portable fire extinguishers or other fire control equipment, spill control equipment and decontamination equipment?  yes  no

**265.32(4)**

d. Adequate volume of water?  yes  no

**265.33**

5. Does the facility test and maintain the above equipment to assure its proper operation?  yes  no

**265.35**

6. Is there sufficient aisle space to allow the unobstructed movement of personnel and equipment to areas where hazardous waste are located in the event of an emergency?  yes  no

**265.37(a)(1)**

7. Has the facility made arrangements with local authorities to familiarize them with the layout of the facility and the nature/hazards of the hazardous waste handled at the facility?  yes  no

**262.34(a)(5)**

8. Has the facility prepared a contingency plan and is it maintained at the facility? **yes** no

If yes, does it contain the following:

**265.52(a)**

a. Description of the actions that are to be taken in case of an emergency (all potential types of emergencies should be identified)? **yes** no

**265.52(c)**

b. Description of arrangements made with local authorities? **yes** no

**265.52(d)**

c. Current list of emergency coordinators' names, addresses and phone numbers (office and home)?  
**yes** no      Need to be updated

**265.52(e)**

d. List of all emergency equipment at the facility, including locations, descriptions and relevant capabilities? **yes** no

**265.52(f)**

e. evacuation plan for facility personnel? **yes** no

The inspector should obtain a copy of the facility's contingency plan if any problems are found.

**265.53(2)**

9. Were copies of the contingency plan submitted to local authorities that may provide emergency services? **yes** no

10. Has the facility's contingency plan ever failed in an emergency? **yes** **no** N/A

If yes:

**265.54(2)**

a. Was the contingency plan immediately amended?  
**yes** no

**265.52(b)**

11. Has the facility's Contingency Plan been approved by Pa DER? **yes** no

**265.54(3), (4) & (5)**

12. Was the contingency plan amended when either the facility or its operations, list of emergency coordinators or list of emergency equipment had changed?  yes  no  N/A

If no, describe: \_\_\_\_\_

---

**265.56(j)**

13. If the contingency plan is implemented, does the facility record the incident in its operating log and submit a written report of the incident to Pa-DER within 15 days?

yes  no  N/A

**262.34(a)(2)**

14. What is the method of waste storage:

Containers?  yes  no

Tanks? yes  no

Containment Buildings? yes  no

Other? yes  no

If other, describe: \_\_\_\_\_

---

---

Answer the following questions if the facility uses container storage.

**262.34(a)(2) & (4), 265.173(c)**

15. Are the container(s) marked with (1) the yellow DOT Hazardous Waste labels, (2) a label to identify its contents and (3) the date that waste accumulation in that container begins? yes  no

If no, describe: The yellow hazardous waste label is placed on the drums, day of shipment by Clean Harbors, Inc.

---

**262.34(a)**

16. Based upon accumulation dates, have any container(s) been in storage for more than 90 days? yes  no

If yes, the inspector should complete the appropriate TSD checklists.

**265.171**

17. Are container(s) in good condition? yes  no

If no, explain: \_\_\_\_\_

---

---

**265.172**

18. Are container(s) made of or lined with materials which will not react with or be incompatible with the waste they are storing? yes  no

**265.173(a)**

19. Are container(s) kept closed? yes  no

**265.173(b)**

20. Are container(s) opened, handled or stored in a manner which may rupture the container or cause it to leak?  
yes  no

If yes, describe: The drum was open at the top as shown in photographs (See Report).

---

---

**265.171**

21. Are any container(s) leaking? yes  no

If yes, describe: \_\_\_\_\_

---

---

**265.174**

22. Are container storage area(s) inspected at least weekly and is an adequate inspection record/log maintained?  
yes  no

If no, explain: \_\_\_\_\_

---

---

**265.176**

23. Are container(s) holding ignitable or reactive waste located at least 15 meters (50 feet) from the facility's property line?    yes    no    N/A

24. Are incompatible wastes placed in the same container(s)?  
yes    no

If yes:

**265.177(a) & 265.17(b)**

a. Is there any evidence that conditions of extreme heat or pressure, fire or explosion, violent reactions or toxic emissions occurred?    yes    no

If yes, describe: \_\_\_\_\_

---

---

---

**265.177(c)**

25. Are container(s) holding incompatible hazardous waste properly separated or protected from one another while in storage?    yes    no    N/A

If no, explain: \_\_\_\_\_

**265.178(a)**

26. Does the container storage area have an effective containment system capable of collecting and holding spills, leaks and precipitation?    yes    no

If yes:

**265.178(a)(2)**

a. Does the containment system provide efficient drainage from the base to a sump or collection system?

yes    no

**265.178(a)(3)**

b. Does the containment system have sufficient capacity to contain the entire volume of the largest container or 10% of the total volume of all the containers, whichever is greater?    yes    no

**265.178(b)**

c. Is run-on into the containment system prevented?  
yes      no

**265.178(c)**

d. Is spilled or leaked waste removed from the sump or collection system with sufficient frequency to prevent overflow?      yes      no

27. In the case of flowable liquid wastes (<20% solids) in containers of less than 110 gal capacity:

**265.178(e)(1)**

a. Does the container height exceed 6 feet for indoor storage of reactive or ignitable hazardous waste?  
yes      no      N/A

**265.178(e)(2)**

b. Does the container height exceed 9 feet for outdoor storage of reactive or ignitable hazardous waste?  
yes      no      N/A

**265.178(e)(3)**

c. Does the container height exceed 9 feet for either indoor or outdoor storage of non-reactive or non-ignitable hazardous waste?      yes      no      N/A

**265.178(e)(1) & (2)**

28. Is there at least a 5 foot wide aisle for any storage area where reactive or ignitable hazardous is stored?

yes      no      N/A

29. In the case of outdoor storage of reactive or ignitable waste:

*N/A*

**265.178(e)(2)**

a. Is there at least a 12 foot wide main accessway through a container storage area?      yes      no      N/A

b. Is there a minimum 40 foot setback from a building?  
yes      no      N/A

Answer the following questions if the facility uses tank storage.

**262.34(a)(2)**

30. Is the tank(s) labelled or clearly marked with the words "Hazardous Waste"?      yes      no

**262.34(a)**

31. Is the tank(s) marked with the date that waste accumulation begins in that tank(s) or does the facility have in its records when waste accumulation started in that tank(s)? yes no

**262.34(a)**

32. Based upon accumulation dates, has the facility stored hazardous waste in its tank(s) for longer than 90 days? yes no

If yes, the inspector should complete the appropriate TSD checklists.

33. Which of the following describes the type of tank(s) employed at this facility (circle the appropriate one)?

- a. Indoor - not on impermeable floor
- b. Indoor - on impermeable floor
- c. Outdoor - above ground
- d. Outdoor - in ground
- e. Outdoor - underground

34. What is the approximate age of the tank(s)? \_\_\_\_\_

35. Does the tank(s) appear to be in good condition?  
yes no can't tell

If no, describe: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

36. Is the tank(s) leaking? yes no can't tell

If yes, describe: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**265.193(a)**

37. Is the tank(s) provided with an effective secondary containment system of adequate volume? yes no

Describe what exists: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**265.194(a)**

38. Is the waste that is stored in the tank compatible with the material in which the tank or its liner, ancillary equipment or secondary containment system is constructed and that such waste will not cause the tank system to rupture, leak, corrode or otherwise fail? yes no

If no, describe: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**265.194(b)(1) & (2)**

39. Is the tank(s) equipped with spill and overflow controls such as check valves, level sensing devices, high level alarms, automatic feed cutoff, bypass to a standby tank, etc.? yes no

**265.194(b)(3)**

40. Is there sufficient freeboard (2 feet) in uncovered tanks to prevent overtopping or spill over by wave or wind action or precipitation? yes no N/A

**265.194(d)**

41. Are tanks labelled to accurately identify their contents? yes no

**265.195**

42. Is the tank(s) inspected each operating day?  
yes no

If yes, do inspections include:

**265.195(a)**

a. Overfill/spill control equipment? yes no

**265.195(2)**

b. Aboveground portions of the tank? yes no

**265.195 (3)**

c. Data gathered from monitoring and leak detection equipment? yes no

**265.195 (4)**

43. Is the construction materials of the tank(s) inspected at least weekly? yes no

**265.195 (5)**

44. Is the construction materials of, and the area surrounding, discharge confinement structures inspected at least weekly? yes no N/A

45. Does the facility properly document all of the results of its tank system inspections? yes no

**265.196 (40 CFR)**

46. Is there any indication that the facility did not properly respond to spills or leaks from a tank(s). (this would include failure to stop the spill/leak, failure to clean up spilled/leaked material, failure to minimize migration, failure to remove tank from service immediately, failure to provide notification, etc.)? yes no

If yes, describe:

---

---

---

47. Does the facility store any ignitable or reactive waste in its tank(s)? yes no

If yes:

**265.198(a)(1)**

a. Is the waste treated, rendered or mixed before or immediately after placement in the tank(s) so that it no longer meets the definition of ignitable or reactive waste? yes no

**265.198(a)(2)**

b. Is the waste stored in such a way that it is protected from any material or conditions that may cause the waste to ignite or react? yes no

**265.198(a)(3)**

c. Is the tank(s) used solely for emergencies? yes no

~~265.198(b)~~

d. Does the tank(s) appear to be a safe distance from the facility's property line and public thoroughfares?  
yes      no

If no, describe: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

~~265.199(a) & (b)~~

48. Is there any indication that incompatible wastes are being stored in a tank(s)?    yes    no

If yes:

~~265.199(a)~~

a. Is there any evidence that conditions of extreme heat or pressure, fire or explosion, violent reactions or toxics emissions occurred?    yes    no

If yes, describe: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

~~Answer the following questions if the facility uses containment buildings as a storage unit.~~

~~(effective February 18, 1993)~~

~~265.1101(a)(1) & (2)~~

49. Is the containment building(s) completely enclosed and designed and constructed of man-made materials that are of sufficient strength?    yes    no

If no, describe: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**265.1101(a) (3)**

50. Is there any indication that incompatible waste is being improperly stored in the containment building?

yes      no

If yes, describe: \_\_\_\_\_

\_\_\_\_\_

**265.1101(a) (4)**

51. Does the containment building(s) have a primary barrier that appears to be sufficiently durable and effective?

yes      no

If no, describe: \_\_\_\_\_

\_\_\_\_\_

52. Does the containment building manage hazardous waste containing free liquids?      yes      no

If no, skip to question 55:

**265.1101(b) (2)**

53. Is there a liquid collection and removal system available to prevent the accumulation of liquid on the primary barrier?      yes      no

If yes, describe the system and the presence/absence of collected liquids: \_\_\_\_\_

\_\_\_\_\_

**265.1101(b) (3)**

54. Is there an effective secondary containment system (i.e., secondary barrier) and a leak detection system capable of detecting failure of the primary barrier?      yes      no

If no, describe: \_\_\_\_\_

\_\_\_\_\_

55. Does the containment building serve as secondary containment for tank(s) placed within the building?  
yes      no

If yes,

**265.1101(b)(3)(iii)**

a. Does it appear to meet the secondary containment system requirements for tanks described in §265.193 (i.e., must be compatible with waste, have sufficient strength and durability, and be designed to effectively detect and collect releases of liquid)?      yes      no

If no, describe: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**265.1101(c)(1)(i)**

56. Is the primary barrier free of significant cracks, gaps, corrosion or other deterioration/openings?      yes      no

**265.1101(c)(1)(ii)**

57. Is the hazardous waste stored at a height that exceeds the height of any containment wall?      yes      no

**265.1101(c)(1)(iii)**

58. Is any hazardous waste tracked outside of the containment building by personnel or equipment?      yes      no

**265.1101(c)(1)(iv)**

59. Are any fugitive emissions exiting the containment building via doors, windows, cracks, vents, etc?  
yes      no

**265.1101(c)(2)**

60. Does the facility have a certification for the containment building by a qualified registered professional engineer?      yes      no

61. Does the facility have an inspection plan for its containment building that establishes an effective inspection program, including a schedule that requires all monitoring/leak detection equipment to be inspected as well as checks for leaks/releases at least every 7 days?      yes      no

**265.1101(c)(3)**

62. Is there any indication that the containment building was improperly operated or maintained or that the owner/operator did not respond properly once the detection of a hazardous waste release occurred?  
yes      no

If yes, describe: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**262.34(a)**

63. Does the facility have written documentation showing that procedures are in place to ensure that individual additions and removals of waste to/from the containment building are consistent with the 90 day storage time limit that applies for all wastes managed in the unit?      yes      no

If waste is being stored in a containment building for greater than 90 days, the inspector should complete the appropriate TSD checklist.

**Additional Comments**

---

---

---

---

## V. Recordkeeping and Reports.

### 262.42((b))

1. Does the facility prepare an Exception Report and submit it to the Pa. DER if a signed copy of the manifest is not received within 45 days of the date the waste was accepted by the initial transporter?  yes  no

If yes, does the Exception Report include:

#### 262.42(b)(1)

- a. Legible copy of the manifest?  yes  no

#### 262.42(b)(2)

- b. Cover letter explaining generator's efforts to locate waste and the results of those efforts?  yes  no

### 262.41(a)

2. If the facility ships any hazardous waste off-site, does it prepare a Quarterly Report and submit it to Pa. DER by the appropriate dates (i.e., April 30, July 31, October 31, January 31)?  yes  no  N/A

If yes, does the facility use the form designated by Pa. DER as its Quarterly Report and is it properly completed?

yes  no

If no, explain: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

3. Does the facility provide to EPA, on at least a biennial basis (by March 1 of each even numbered year), the following:

#### 262.41(a)(6) (40 CFR)

- a. A description of the efforts undertaken during the year to reduce the volume and toxicity of the waste generated?  yes  no

#### 262.41(a)(7) (40 CFR)

- b. A description of the changes in volume and toxicity of the waste actually achieved during the year?  yes  no

### 262.40(a)(b)(c)

4. Does the facility retain copies of signed manifests, Quarterly Reports, Exception Reports and test results/waste analyses for a minimum of 20 years from the date that the waste was last sent to on-site or off-site treatment, storage or disposal?  yes  no

**262.45**

5. Has the facility submitted to Pa. DER, if required, a properly prepared plan relating to the disposal of its hazardous waste either at an on-site or off-site treatment or disposal facility?    yes    no    **N/A**

**262.46(d)**

6. Has the facility filed a properly prepared report with Pa. DER within 15 days of any event where a discharge or spill equal or greater than the reportable quantity for that given hazardous waste occurred or any discharges into surface or ground water?    **yes**    no    **N/A**

**A d d i t i o n a l      C o m m e n t s :**

## SMALL QUANTITY GENERATORS

Answer the following questions if the facility generates a total quantity of hazardous waste between 100 kg and 1000 kg per month (or less than 1 kg of acutely hazardous waste or 100 kg of clean-up residue/debris containing P or U listed wastes).

Answer questions in General Section (i.e., numbers 1 through 5) of this checklist.

1. Does the facility accumulate hazardous waste on-site?  
yes      no

If no, skip to question 3.

2. Has the facility accumulated more than 1000 kg of hazardous waste (or more than 1 kg of acutely hazardous waste or 100 kg of clean-up residue/debris containing P or U listed wastes)?  
yes      no

### **261.5(d) & 216.5(g)(2)**

If yes, the facility is subject to all of the LQG regulations for those accumulated wastes for which the accumulation quantity limit was exceeded. In addition, the 90 day accumulation time limit begins for SQGs when the accumulated waste exceeds the accumulation quantity limit. In this case the entire LQG checklist must be completed as well.

If no, answer the following questions:

### **261.5(g)(1)**

3. Has the facility complied with the hazardous waste determination requirements applicable to all generators?  
yes      no

If no, the facility is not excluded from Chapters 262 - 265 and the other sections of this checklist will need to be completed.

### **261.5(g)(3)**

4. Is there any indication that the facility is not properly treating or disposing of its wastes either at an on-site or off-site facility?    yes      no

If yes, the facility is not excluded from Chapters 262 - 265 and the other sections of this checklist will need to be completed.

If yes, describe problem with waste treatment or disposal:

---

---

---

---

262.11(c) & (d)

5. Does the facility retain copies of waste evaluation material as well as records of quantities, descriptions and dispositions of the wastes for at least five years?

yes      no

Additional Comments:

LDR CHECKLIST FOR GENERATORS

261.20 - 261.24

1. Does the facility generate any "characteristic" hazardous waste?

Yes       No

If yes, circle the appropriate one(s)

D001

D002

D003

D004-D017

D018-D043\*

\* Newly listed - not yet subject to LDR regs

55 FR 22534(o) (6/1/90)

2. Does the facility generate any hazardous waste that is a liquid and either contains over 50 ppm of PCB, over 1000 ppm of HOCs and has an unrelated characteristic property, or is a characteristic waste containing over 134 ppm of nickel and/or 130 ppm of thallium (i.e., relevant descriptors of old California List wastes)?

Yes       No

261.30 - 261.33

3. Does the facility generate any "listed" hazardous waste?

Yes       No

Circle the appropriate code(s)

F

K

P

U

4. Does the facility generate any hazardous debris (debris means any solid material exceeding a 60 mm particle size that is a manufactured object, plant or animal matter or natural geologic formation but is not a process residual such as a slag, sludge/residue associated with waste treatment or a material already having a specified treatment standard - hazardous debris means a debris containing a hazardous waste)?

Yes       No

If yes, has the hazardous debris been excluded from the definition of a hazardous waste under 261.3(e)(2) i.e., determined not to be a hazardous waste by the Regional Administrator/Director?

Yes       No

**268.1(e)**

5. Is any of the facility's waste excluded from LDR regulation because (a) it was generated by a small quantity generator (<100 kg/mo), (b) it was a waste pesticide that a farmer disposed of, (c) it was not identified or listed as hazardous until after November 8, 1984 and prohibitions/treatment standards have not yet been promulgated, (d) it was a de minimis loss to wastewater treatment systems of a commercial chemical product or chemical intermediates that are ignitable or corrosive or (e) it is a laboratory waste displaying the characteristic of ignitability or corrosivity that is commingled with other plant wastewaters? Yes  No

If yes, describe:

---

---

---

**268.5 & 268.6**

6. Is any of the facility's waste subject to an LDR exemption waiver, delisting or national capacity variance? Yes  No

If yes, describe which and obtain documentation:

---

---

---

**262.11(c) 55 FR 22530(B.2) (6/1/90) 268.9(a)**

7. Does the facility (a) test its waste or (b) apply knowledge of its waste to determine whether its listed waste exhibits a characteristic of hazardous waste?

Yes  No  N/A

If yes, circle (a) or (b)

**268.7(a)**

8. Does the generator (a) test its waste(s) or (b) use knowledge of the waste(s) to determine if it is prohibited from land disposal (i.e., does not meet applicable treatment standards)?

Yes  No

If yes, circle (a) or (b)

**268.9(a)**

9. Does the generator determine each EPA hazardous waste code applicable to the waste in order to determine the applicable treatment standards? **Yes** **No**

**268.7(a) 55 FR 22535(P) (06/01/90)**

10. If testing of waste is performed, does the facility do a total waste analysis where required and/or a TCLP waste extract analysis where it is required? **Yes** **No** **N/A**

**268.7(a)**

11. If the facility generates either an ignitable waste (D001) or a corrosive waste (D002) has it determined what underlying hazardous constituents are reasonably expected to be present in this waste? **Yes** **No** **N/A**

**268.7(a)(1) 268.32 268.40 - 268.43**

12. Does the facility's hazardous waste(s) exceed the applicable treatment standards upon generation? **Yes** **No** **N/A**

**51 FR 40606(V) (11/7/86)**

13. If the facility generates waste containing any of the organic solvents listed in the F001 - F005 waste codes, were those chemicals used for or did the waste result from their solvent properties (i.e., degreasing, dissolving, cleaning, solubilizing, etc.)? **Yes** **No** **N/A**

If N/A, skip to question 16

If no, what were these chemicals used for? Describe below:

---

---

---

14. How did the facility classify the waste containing the organic solvents listed in the F001 - F005 waste codes (circle the appropriate waste code)?

**D001**

**TC**

**F001 -F005**

**P or U**

**Other(describe)**

---

---

---

15. Is there any evidence that solvent waste was misclassified?

Yes

No

If yes, describe

---

---

268.2(f) 268.41 - 268.43

16. Does the facility analyze its waste for TOC and TSS to determine proper treatability group (i.e., wastewater or non-wastewater) or in the case of D001, proper waste subcategory)?

Yes

No

N/A

If no, describe below how this determination is made:

---

---

17. Does it appear that any other restricted waste was misclassified or placed in the wrong treatability/sub-category group? Yes No

If yes, describe:

---

---

18. Does the facility, in any way, mix/aggregate/dilute any of its restricted hazardous waste with another hazardous waste, non-hazardous waste or non-waste material prior to (1) storage, (2) treatment or (3) disposal? Yes No

If no, skip to question 19

If yes, circle (1), (2) or (3) as well as the appropriate one below:

a) D001 - D003 non toxic characteristic waste (NTCW) mixed with non-hazardous waste or non-waste material

b) NTCW mixed with another NTCW

- c) NTCW mixed with D004 - D017 toxic (EP/TC) characteristic waste (TCW)
- d) NTCW mixed with F,K,P or U listed hazardous waste (LW)
- e) TCW mixed with non-hazardous waste or non-waste material
- f) TCW mixed another TCW
- g) TCW mixed with LW
- h) LW mixed with non-hazardous waste or non-waste material
- i) LW mixed with another LW

**268.3 55 FR 22537(d.1) (6/1/90)**

19. Based on the above and any other observations, does it appear that the facility is using dilution as a substitute for appropriate/legitimate treatment or to improperly switch treatability group (i.e., wastewater vs non-wastewater)?

Yes

No

If yes, describe as necessary:

---

---

---

**268.41(b) 268.43(b) 55 FR 22537(c.2) (6/1/90)**

20. In the case of a mixture of listed wastes, does the facility recognize that the most stringent standard for a particular constituent is the one that applies?

Yes

No

N/A

**55 FR 22536(b)**

21. In the case of a mixture of wastes with both concentration level treatment standards and specified treatment technology, does the facility recognize that both must be achieved?

Yes

No

N/A

**268.9(b)**

22. Where waste or waste mixtures have both characteristic and listed waste codes, does the facility recognize that the treatment standard associated with each characteristic and listed waste must be met unless the characteristic constituent is specifically addressed in the treatment standard for the listed waste?

Yes

No

N/A

**268.9(d)**

23. Does the facility send treated characteristic waste that is no longer hazardous to a Subtitle D landfill?

Yes      No      **N/A**

If yes:

a. Has it placed a one-time notification and certification in its files and sent a copy to the EPA Regional Administrator/State Director?    Yes      No

b. Is the notification and certification updated whenever the process or operation generating the waste changes and/or if the Subtitle D facility receiving the waste changes?

Yes      No      N/A

24. Does the facility generate lab packs?      **Yes**      No

If no, skip to question 27

25. Are there Appendix IV or Appendix V wastes in these lab packs?

Yes      **No**

**268.7(a)(7)&(8)**

26. Are alternate treatment standards being applied?

Yes      **No**

If no, are the proper waste/constituent specific treatment standards being applied?      Yes      No

If yes -

Has the generator notified the treatment facility, in writing, of all waste codes contained in the lab packs?      **Yes**      No

Has the generator stated that its lab pack is an Appendix IV or Appendix V lab pack and certified that hazardous wastes contained therein are listed in the applicable appendix?      Yes      No

**268.7(a)(4)**

27. Does the facility treat any of its hazardous wastes in 90 day tanks or containers to meet the applicable treatment standards?

Yes      **No**

If yes, has the facility prepared a waste analysis plan which includes frequency of testing?      Yes      No

If yes, has the plan been filed with the Regional Administrator?

Yes      No

**268.7(a)(1)**

28. Has the generator submitted notifications to the treatment facility if its waste does not meet applicable treatment standards?

Yes      No      N/A

If yes, answer the following questions pertaining to notifications:

**268.7(a)(1)(ii)**

a) Is there any evidence to indicate that the facility has not referenced the appropriate treatment standards in its notifications?    Yes      No

If yes, describe:

---

---

---

**268.7(a)(1)(iii)**

b) Does the facility specify in its notifications the actual treatment standards (i.e., not referencing them) for F001 - F005, F039 or California List wastes?

Yes      No      N/A

**268.7(a)(1)(i)**

c) Do the notifications include the EPA Hazardous Waste Number?    Yes      No

**268.7(a)(1)(iii)**

d) Do the notifications include the manifest number associated with the shipment of waste?    Yes      No

**268.7(a)(1)(iv)**

e) For hazardous debris which hadn't been excluded under 261.3(e)(2) (excluded hazardous debris is not subject to notification/certification requirements), do the notifications include the contaminants subject to treatment and the following statement: "This hazardous debris is subject to the alternative treatment standards of 40 CFR 268.45".

Yes      No      N/A

**268.7(a)(1)(v)**

f) Do the notifications include available waste analysis data?

Yes      No      N/A

**268.7(a)(3)(v)**

f) Do the notifications include, in the case of waste that is not prohibited (i.e., subject to an exemption, cases-by-case extension, etc.), the date the waste is subject to the prohibitions?    Yes           No           N/A

**268.7(a)(2)**

29. Does the facility submit both a notification and certification to the disposal facility that its waste can be land disposed, if it meets the appropriate treatment standards?

Yes     No     N/A

**268.7(a)(5)   268.7(a)(7)**

30. Has the generator retained in on-site files the following materials:

a) all data used to determine whether its waste is restricted or meets applicable treatment standards upon generation, including knowledge of waste and test results?     Yes     No

b) copies of all notices and certifications that were sent to treatment/disposal facilities?     Yes     No

**55 FR 22662(A.1)   268.7(a)(6)**

31. If the generator treats a restricted waste in a WWTP having an NPDES permit, is there a statement in its operating log indicating that the WWTP is treating a RCRA restricted waste?

Yes     No     N/A

KEY TERMS/DEFINITIONS

CLASS I SDWA SYSTEM means a Class I deep well facility regulated under the Safe Drinking Water Act (SDWA).

CWA SYSTEM means a centralized wastewater treatment facility discharging under a Clean Water Act (CWA) permit. For example, a CWA facility would treat organic or inorganic aqueous wastes and discharge the treated effluent to the local sewer system. Examples of CWA treatment systems owned and operated by Clean Harbors include the wastewater treatment operations at Baltimore (including the CES system), Bristol, Chicago, Cincinnati and Cleveland.

CWA-EQUIVALENT SYSTEM means a "zero discharge system" that engages in "CWA-equivalent" treatment before land disposal. Zero-discharge facilities treat hazardous wastes using "CWA-equivalent" treatment methods, but do not discharge the treated effluent to a sewer or water body (e.g., spray irrigation land farm). "CWA-equivalent" treatment methods means biological treatment for organics, alkaline chlorination, or ferrous sulfate precipitation for cyanide, precipitation sedimentation for metals, reduction of hexavalent chromium, or other treatment technology that can be demonstrated to perform equally or greater than these technologies.

HIGH TOC IGNITABLE LIQUIDS SUBCATEGORY means an ignitable liquid hazardous waste (waste code D001) which contains greater than or equal to 1% total organic carbon (TOC). Pursuant to 40 CFR 268.40, such wastes must be treated using organic recovery (RORG) or combustion (CMGST) technology. Examples of RORG technologies include the CES unit at Clean Harbors of Baltimore. Examples of CMGST technologies include hazardous waste fuel blending and subsequent reuse at a cement kiln, or destruction at a RCRA incinerator.

WASTEWATERS are wastes that contain less than 1% by weight total organic carbon (TOC) and less than 1% by weight total suspended solids (TSS), with the following exceptions: (1) F001-F005 wastewaters are solvent-water mixtures that contain less than 1% by weight TOC or less than 1% by weight total F001-F005 solvent constituents listed in the table "Treatment Standards for Hazardous Wastes" in Section 268.40; (2) K011, K013, and K014 wastewaters contain less than 5% by weight TOC and less than 1% by weight TSS, is generated; and (3) K103 and K104 wastewaters contain less than 44% by weight TOC and less than 1% by weight TSS. (See 40 CFR 268.2(f))

KEY TERMS/DEFINITIONS

CONTAMINANTS SUBJECT TO TREATMENT (CSTT) are the specific constituents listed by waste code number in the Treatment Standard Table in §268.40. CSTT must be identified for all hazardous debris wastes that are intended for treatment using one of the hazardous debris alternate treatment technologies described in §268.43.

REASONABLY EXPECTED TO BE PRESENT means that the generator is relying on knowledge of the raw materials used, the process, and potential reaction products, or on the results of a one-time analysis for the entire list of UHC's that may be present in the untreated hazardous waste. If a one-time analysis of the entire list of UHC's is conducted, subsequent analyses are required for only those pollutants which would reasonably be expected to be present in the waste as generated, based on the previous sampling and analysis results.

UNDERLYING HAZARDOUS CONSTITUENT (UHC) means any constituent listed in §268.48 Table UTS - Universal Treatment Standards (except vanadium and lead which can reasonably be expected to be present at the point of generation of the hazardous waste, at a concentration above the constituent-specific UTS treatment standard. (See 40 CFR 268.23)

## LAND DISPOSAL RESTRICTION AND WASTE ANALYSIS CRITERIA FORM

TO: SAFETY-KLEEN CORP.

EPA ID NO.

NCD077840148

DESIGNATED FACILITY

DESIGNATED FACILITY

ADDRESS: 6182 OLD MENDENHALL RD ARCHDALE NC 27263

Under manifest/sales service number PAE 3542932, the generator noted below is shipping to you a waste determined to be restricted under 40 CFR Part 268. In accordance with CFR Part 268.7, the generator hereby provides notice that the waste is restricted from land disposal. A copy of this form must be kept by the generator and facility for five (5) years from the date of waste shipment.

WASTE NAME (FOR NON-WASTE WATER)	WASTE CODE *	THE WASTE MAY CONTAIN THE FOLLOWING RESTRICTED CONSTITUENTS	TREATMENT STANDARD (mg/kg) OR METHOD (unless otherwise noted)
<input type="checkbox"/> Waste Paint Related Material SKDOT 523	F003 F003 F003 F003 F005 F005 D001  D008 D018 D035 D039 D040	Acetone Methyl Isobutyl Ketone Xylene Methanol Methyl Ethyl Ketone Toluene Ignitable Liquid (High TOC Subcategory)  Lead (TOC Subcategory) Benzene Methyl Ethyl Ketone Tetrachloroethylene Trichloroethylene	160 (non-waste water) 33 (non-waste water) 30 (non-waste water) ** .75 (non-waste water) 36 (non-waste water) 10 (non-waste water) ** Combustion (CMBST) or recovery (RORGS) (40 CFR 268.42)(non-waste water) 5.0 (mg/l, non-waste water) 10 (non-waste water) 36 (non-waste water) 6.0 (non-waste water) 6.0 (non-waste water)

<input type="checkbox"/> Waste Perc. Filters	F002 D039	Tetrachloroethylene Tetrachloroethylene	6.0 (non-waste water) ** 6.0 (non-waste water)
<input type="checkbox"/> Waste Photo Fixer Solution	D011	Silver	5.0 (non-waste water)
<input type="checkbox"/> Separator Water	F002 D039	Tetrachloroethylene Tetrachloroethylene	.056 (mg/l, waste water) .056 (mg/l, waste water)
<input type="checkbox"/> Waste Sterilant - Hot	D001 D035	Ignitable Liquid (High TOC Subcategory) Methyl Ethyl Ketone	CMBST or RORGS (40 CFR 268.42)(non-waste water) 36 (non-waste water)
<input type="checkbox"/> Waste Trichlorotrifluoroethane	F002	Trichlorotrifluoroethane	30 (non-waste water)
<input type="checkbox"/> Waste 1,1,1 Trichloroethane	F002	1,1,1 Trichloroethane	6.0 (non-waste water)

The constituent composition is based on known edge of the waste in a Material Safety Data Sheets for the chemicals used, and the process which created the waste. The treatment standards do not include reclamation or treatment steps. These treatment standards for these constituents were: Xylene = 20 mg/l, Toluene = 20 mg/l, Tetrachloroethylene = 5.0 mg/l.

PHASE II: THE GENERATOR IS NOT REQUIRED TO LIST UNDERLYING CONSTITUENTS BECAUSE TREATER WILL MONITOR FOR ALL 216 REGULATED CONSTITUENTS PRIOR TO DISPOSAL.

THE HAZARDOUS WASTES IDENTIFIED ON THE HAZARDOUS WASTE MANIFEST IDENTIFIED ABOVE AND BEARING THE EPA HAZARDOUS WASTE CODES LISTED BELOW ARE RESTRICTED WASTES WHICH ARE PROHIBITED FROM LAND DISPOSAL WITHOUT FURTHER TREATMENT UNDER THE LAND DISPOSAL RESTRICTIONS, 40 CFR PART 268 AND RCRA SECTION 3004(D). IN ACCORDANCE WITH 40 CFR 268.7(A)(1), THE EPA WASTE CODE, WASTE SUBCATEGORY, AND TREATABILITY GROUPS, AS APPLICABLE, ARE INCLUDED BELOW.

**INSTRUCTIONS -- COMPLETE ALL SECTIONS. REFER TO PAGE 3 OF THIS FORM FOR KEY TERMS/DEFINITIONS.**

Column 1 - Line Item: Enter the manifest line item number (e.g., 11a) that corresponds to the waste code(s).

Column 2 - Waste Codes/Subcategory: Check off all applicable waste codes. For D001 through D043, also check applicable subcategory; for F001 through F005, check applicable constituents.

Column 3 - Wastewater/Non-wastewater: Check off "WW" for wastewater and "Non-WW" for non-wastewaters.

Column 4 - LDR Handling Code: Circle the appropriate handling code, as follows:

1 = The waste is a characteristic hazardous waste D001 or D002 which is intended for treatment/disposal in a CWA system, CWA-equivalent system, or Class I SDWA system. Underlying Hazardous Constituents (UHC's) are NOT required to be identified.

1A = The waste is a characteristic hazardous waste D001 High TOC Ignitable Liquids Subcategory (i.e., greater than or equal to 10% TOC). Pursuant to 40 CFR 268.40, the waste must be treated using organic recovery (RORGs) or combustion (CMBST) technology. UHC's are NOT required to be identified.

2 = The waste is a characteristic hazardous waste D001 (other than High TOC Ignitable Liquids), D002, D012-17 non-wastewater, or D018-43 which is intended for treatment/disposal in a non-CWA system, non-CWA-equivalent system, or non-Class I SDWA system located in the United States. All UHC's which are reasonably expected to be present must be identified, except for D001 waste that is intended to be treated using organic recovery (RORGs) or combustion (CMBST) technologies. Identify UHC's by completing Sections I and IV of CHI Form LDR-1 Addendum and attach completed Addendum to this form.

3 = The waste is a characteristic (i.e., D-code) or listed (i.e., F-, K-, U-, or P-code) hazardous waste which is intended for export and treatment/disposal at a facility located outside the United States. LDR treatment standards do not apply to hazardous waste treated/disposed in a foreign country, and per USEPA guidance, the identification of UHC's (if applicable) is not required for hazardous waste that is intended to be exported. Note however that if the exported waste is subsequently returned for treatment/disposal in the United States, all applicable LDR regulations would apply and UHC's would be required to be identified for a characteristic hazardous waste D001 (other than High TOC Ignitable Liquids), D002, D012-17 non-wastewater, or D018-43 treated/disposed in a non-CWA system, non-CWA-equivalent system, or non-Class I SDWA system.

4 = The waste meets the definition of hazardous debris pursuant to 40 CFR 268.2(h) and is intended for treatment/disposal in compliance with the alternate debris treatment technologies of 40 CFR 268.45. In accordance with the requirements of 40 CFR 268.7(a)(1)(iv)(A): (1) "This hazardous debris is subject to the alternative treatment standards of 40 CFR 268.45"; and (2) the contaminants subject to treatment (CSTT's) must be identified as part of this notification. Identify CSTT's by completing Sections III and IV of CHI Form LDR-1 Addendum and attach completed Addendum to this form.

5 = The waste is a characteristic waste D003-11, a characteristic waste D012-17 wastewater, or a listed (i.e., F-, K-, U-, or P-code) hazardous waste. UHC's are NOT required to be identified.

6 = The waste is a lab pack that is intended for incineration using the alternative lab pack treatment standard under 40 CFR 268.42(c). UHC's are NOT required to be identified; however, the generator must complete and attach the lab pack certification statement on CHI Form LDR-LP. Note that in accordance with 40 CFR Part 268 Appendix IV, lab packs which contain waste codes D009, F019, K003, K004, K005, K006, K062, K071, K100, K106, P010, P011, P012, P076, P078, U134, and U151 are not eligible for alternative lab pack treatment standard.

**SECTION II. CHARACTERISTIC WASTES D012 THROUGH D043**

- Check here if the waste is a D012-17 wastewater. If so, the waste must be treated using one of the treatment technologies (e.g., INCIN) specified in the Treatment Standard Table in 40 CFR 268.40. Complete Columns 1 through 3 below, and circle Handling Code 5 in Column 4. UHC's are NOT required to be identified.
- Check here if the waste is a D012-17 non-wastewater or a D018-43 that is intended to be treated in a CWA system, CWA-equivalent system, or Class I SDWA system. If so, the waste is EXEMPT from the LDR regulations, and no further information is required. DO NOT complete Columns 1 through 4 below.
- Check here if the waste is a D012-17 non-wastewater or D018-43 that is intended to be treated in a non-CWA system, non-CWA-equivalent system, or non-Class I SDWA system. If so, complete Columns 1 through 4 below.

KEY TERMS/DEFINITIONS

CLASS I SDWA SYSTEM means a Class I deep well facility regulated under the Safe Drinking Water Act (SDWA).

CWA SYSTEM means a centralized wastewater treatment facility discharging under a Clean Water Act (CWA) permit. For example, a CWA facility would treat organic or inorganic aqueous wastes and discharge the treated effluent to the local sewer system. Examples of CWA treatment systems owned and operated by Clean Harbors include the wastewater treatment operations at Baltimore (including the CES system), Bristol, Chicago, Cincinnati and Cleveland.

CWA-EQUIVALENT SYSTEM means a "zero discharge system" that engages in "CWA-equivalent" treatment before land disposal. Zero-discharge facilities treat hazardous wastes using "CWA-equivalent" treatment methods, but do not discharge the treatment effluent to a sewer or water body (e.g., spray irrigation land farm). "CWA-equivalent" treatment methods means biological treatment for organics, alkaline chlorination, or ferrous sulfate precipitation for cyanide, precipitation/ sedimentation for metals, reduction of hexavalent chromium, or other treatment technology that can be demonstrated to perform equally or greater than these technologies.

HIGH TOC IGNITABLE LIQUIDS SUBCATEGORY means an ignitable liquid hazardous waste (waste code D001) which contains greater than or equal to 10% total organic carbon (TOC). Pursuant to 40 CFR 268.40, such wastes must be treated using organic recovery (RORGs) or combustion (CMBST) technology. Examples of RORGs technologies include the CES unit at Clean Harbors of Baltimore. Examples of CMBST technologies include hazardous waste fuel blending and subsequent reuse at a cement kiln, or destruction at a RCRA incinerator.

WASTEWATERS are wastes that contain less than 1% by weight total organic carbon (TOC) and less than 1% by weight total suspended solids (TSS), with the following exceptions: (1) F001-F005 wastewaters are solvent-water mixtures that contain less than 1% by weight TOC or less than 1% by weight total F001-F001 solvent constituents listed in the table "Treatment Standards for Hazardous Wastes" in Section 268.40; (2) K011, K013, and K014 wastewaters contain less than 5% by weight TOC and less than 1% by weight TSS, as generated; and (3) K103 and K104 wastewaters contain less than 4% by weight TOC and less than 1% by weight TSS. (See 40 CFR 268.2(f))

CLEAN HARBORS ENVIRONMENTAL SERVICES, INC.  
LAND DISPOSAL RESTRICTION NOTIFICATION FORM LDR-LP  
LAB PACK ALTERNATIVE TREATMENT STANDARD CERTIFICATION

Manifest No.

MDC0555201

SECTION I. WASTE CODES ELIGIBLE FOR ALTERNATIVE TREATMENT STANDARD

- Check here if the lab pack contains only those hazardous wastes codes which are NOT listed in 40 CFR Appendix IV (see Key Terms below), and which is intended for incineration in accordance with the alternative treatment standard in 40 CFR 268.42(c). If checked, complete the lab pack certification statement in Section II.
- Check here if the lab pack contains one or more hazardous waste codes identified in 40 CFR Part 268 Appendix IV (see Key Terms below). If checked, the lab pack IS NOT eligible for the alternative lab pack treatment standard.

SECTION II. GENERATOR CERTIFICATION AND SIGNATURE (REQUIRED)

I CERTIFY UNDER PENALTY OF LAW THAT I HAVE PERSONALLY EXAMINED AND AM FAMILIAR WITH THE WASTE AND THAT THE LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I AM AWARE THAT THERE ARE SIGNIFICANT PENALTIES FOR SUBMITTING A FALSE CERTIFICATION INCLUDING THE POSSIBILITY OF FINE OR IMPRISONMENT.

Authorized Signature:

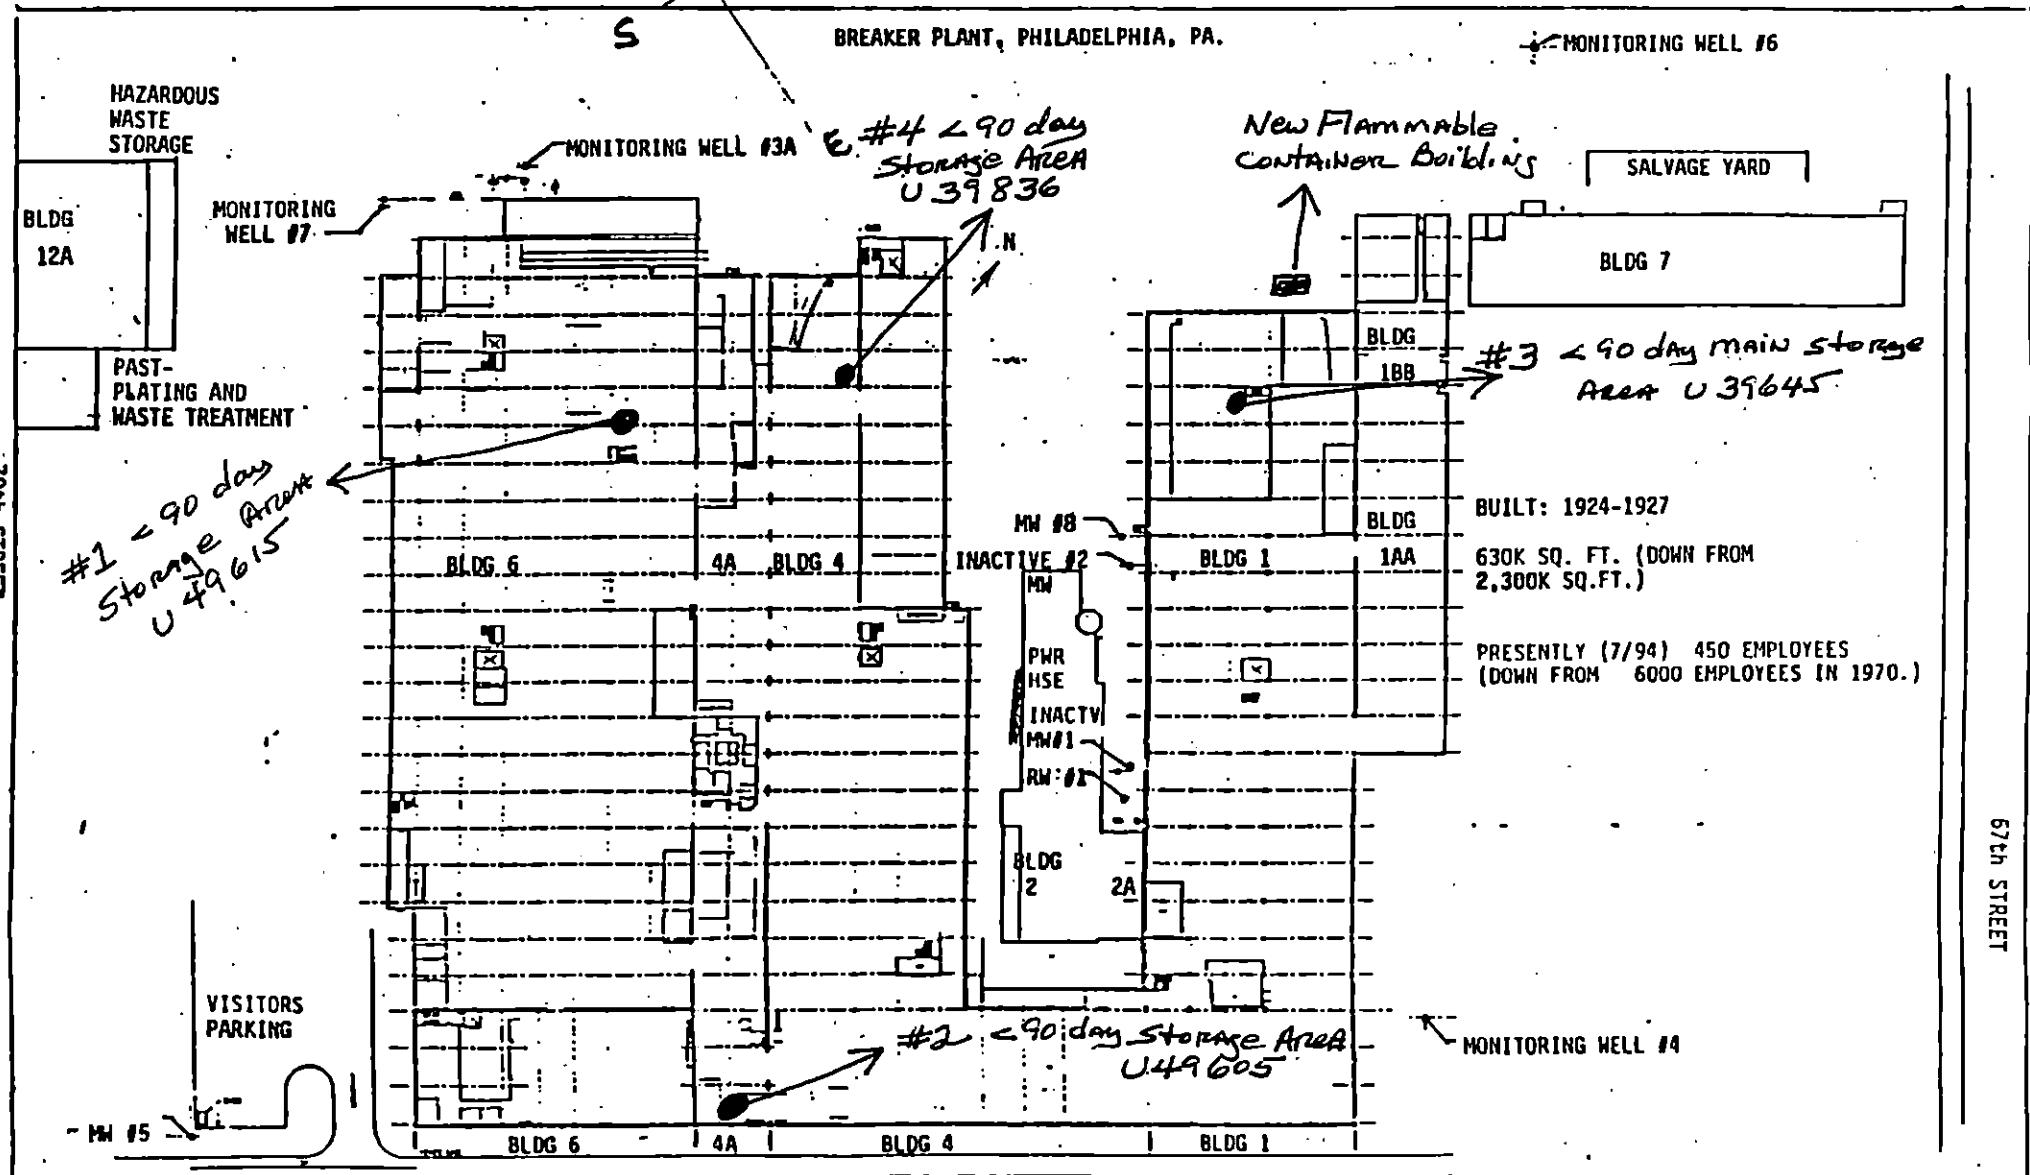

Michael P. Fahey

Date: 12/7/95

KEY TERMS/DEFINITIONS

LAB PACK means waste materials classed as US DOT Class or Division 3, 4.1, 4.2, 4.3, 5.1, 6.1, 8, or 9. Outer packaging must be either open head steel, aluminum, fiber, plastic or plywood drum, meeting at least packing group III performance levels. Each outer packaging must contain only one class of hazardous material. Inner containers may be glass not exceeding 1 gallon capacity, or metal or plastic not exceeding 5.3 gallons capacity. Gross weight of the container may not exceed 452 pounds. Inner packagings containing liquids must have sufficient absorbent material to absorb all liquid contents. (See 40 CFR 172.13)

PART 268 APPENDIX IV means the following waste codes identified in 40 CFR 268 Appendix IV which are not eligible for treatment using the alternative lab pack treatment standard in 40 CFR 268.42(c): D009, F019, K003, K004, K005, K006, K062, K071, K100, K106, P010, P011, P012, P076, P078, U134, and U151.

ATTN: Michael Fairley  
RE: Waste Approvals and Shipment

Dear Mr. Fairley:

This letter is in response to your questions regarding the shipment of your paint waste and profile numbers U49615 and U12789.

Regarding Clean Harbors' (CHESI) profiles in general, profiles are set up so that we can determine what treatment technology we will apply to a particular stream, what regulatory classification it will be shipped under to ensure proper treatment and transportation handling, and how we will price it. The profiles and profile expiration dates are driven by the internal needs and requirements of our various plants, not any RCRA requirements you are subject to as generator pursuant to 40 CFR Part 262.

Profile U49615 is for paint solids, skins or set up waste paint. As you noted on the Clean Harbors profile report I provided you for your Breakers site (GEN228), profile U49615 expired October 31, 1995. A review of your manifests shows that you did not ship any material under this profile after October 31, 1995.

Profile U12789 was utilized in the recent shipment of your low solid paints and thinners waste. This G.E. profile is utilized as a "generic" profile by Clean Harbors. This generic profile covers several GE sites in the region that produce a standard variety of paints and thinner waste from painting processes. The profile describes a hazardous paint waste (waste code F005) that is suitable for fuels blending.

Profile U12789 is the only generic profile that is not included in the reports you have. This profile did not appear in those reports because it is not unique to your G.E. sites (GEN228/GEN662). It was an oversight on my part to not include information showing that this profile is a current, approved active profile with CHESI under which our plants can accept your waste. (see attached)

Page 2 (cont'd)

In summary:

- 1) The hazardous waste generator regulations in 40 CFR Part 262 do not require hazardous waste generators to ship wastes according to profiles. The profile process is something established by Clean Harbors and other treatment, storage and disposal facilities to facilitate waste management and pricing;
- 2) Your waste paint was not shipped under expired Clean Harbors profile U49615; and
- 3) G.E. profile U12789, which was utilized to ship your low solids paint waste, is an active CHESI profile.

If you or your regulatory contacts should have any further questions regarding these profiles, please feel free to contact me at 609-589-5000. I can also put you in touch with our compliance group for further explanation.

Sincerely,

A handwritten signature in black ink, appearing to read "Carol Schneider".
